

Install ionCube loader on your WAMP or XAMPP server.

In order to run eSoftScript Pro on your server you must have installed ionCube on your server. Here are 2 quick ways to install the loader:

1. Install on WAMP server:
 - Download the Free IonCube Loaders for your PC, by choosing your OS platform from [HERE](#)
 - Extract that zip pack to your wamp folder directly. So, that it becomes like this, C:\wamp\ioncube
 - Edit php.ini file: C:\wamp\bin\apache\Apache2.2.11\bin\php.ini and add this line at the bottom of the last line: zend_extension_ts = "C:\wamp\ioncube\ioncube_loader_win_5.2.dll"
 - Restart WAMP.
2. Install on XAMPP server:
 - Download the Free IonCube Loaders for your PC, by choosing your OS platform from [HERE](#)
 - Extract that zip pack to your xampp folder directly. So, that it becomes like this, C:\xampp\apache
 - Install ionCube loader to XAMPP at: C:\xampp\htdocs\ - Open php.ini with your text editor. The file is located at C:\xampp\apache\bin\ or C:\xampp\php\. Add the following line before any other zend_extension statements.
zend_extension_ts = "C:\xampp\htdocs\ - Restart XAMPP.

Success!
